

## **Iowa Association of Naturalists: Booklets and Publications**

The Iowa Association of Naturalists also has produced seven booklet series that provide readers with a clear, understandable overview of topics concerning the Iowa environment and conservation. We have included a few select publications that will be helpful in field studies on the Fit Environment CD. The whole collection can be found electronically via the links below, which will connect you to the Iowa State University Extension website, or by visiting the IAN website: [www.iowanaturalists.org](http://www.iowanaturalists.org). The IAN website also hosts numerous teaching resources, guides to interpretive and environmental education services in Iowa, and much more.
